Part-in projects

An overview of the projects I had the opportunity to participate in, focusing on web development and creating digital solutions to transform ideas into functional, efficient, and impeccably designed products.

Every project I contributed to was driven by the goal of merging technology and creativity, with a strong emphasis on usability, performance, and aesthetics.

Studiogusto's Projects 2022/current

Heineken

Experience & Games

This Web App was designed to provide an immersive and interactive experience inspired by the world of games. WebGL was used to achieve smooth animations and eye-catching graphics. JavaScript handled the Front-End and real-time interactions. Campaign management and contact collection were simplified through integration with Sendgrid.

[View more ↗](#)

Misura

Food & Drink

To modernize the Measure site, a component architecture was developed with React.js. The use of Emotion for CSS-in-JS optimized the management of styles. The project, including the blog section, is based on a custom WordPress to ensure flexibility and seamless integration with the Front-End.

Studiogusto

Agency & Studio

Honors

DEV - Awwwards / SOTD - Awwwards / DDAW - Digital Design Award

The Studiogusto site is developed with React and Next.js, with fluid animations managed by GSAP and CSS-in-JS styling via Emotion. The integration of Three.js enables interactive 3D content, providing an immersive, high-performance user experience in line with the agency's creative vision.

[View more ↗](#)

Litover

Experience & Games

The project Finishing Trends collects in a fresh, colorful and smoothly animated website a digitalized version of the most iconic finishings created by the printing masters at Litover.

[View more ↗](#)

Tecninox

Corporate & Business

Tecninox is an Italian company that manufactures process systems for the pharmaceutical and biotechnology industries. To improve the user experience on the website, navigable 3D videos have been integrated. Interactivity and scrolling are handled with GSAP, using ScrollTrigger, ScrollSmoother, and Observer.

[View more ↗](#)

Ciam

Corporate & Business

CIAM, a leader in design and technology for interior designers in the hospitality industry, has a website developed with React.js and interactive animations managed by GSAP. The styling is taken care of with JSS, while the back-end, based on WordPress and MySQL, is supported by Cloudflare CDN for optimal performance and fast uploads.

[View more ↗](#)

Digital Mosaik

Web 3 & Technology

Honors

DEV - Awwwards / SOTD - Awwwards / DDAW - Digital Design Award

The Digital Mosaik site is developed with React and Next.js, with smooth animations handled by GSAP and optimized scrolling with Lenis. Styles are curated with Emotion, while Three.js creates immersive 3D graphics. Based on WordPress and deployed on Vercel, it guarantees scalability and high performance.

Homely caters to a target audience of occasional customers: people who, from time to time, need tools for simple DIY projects, such as assembling furniture, mounting shelves, or repotting plants.

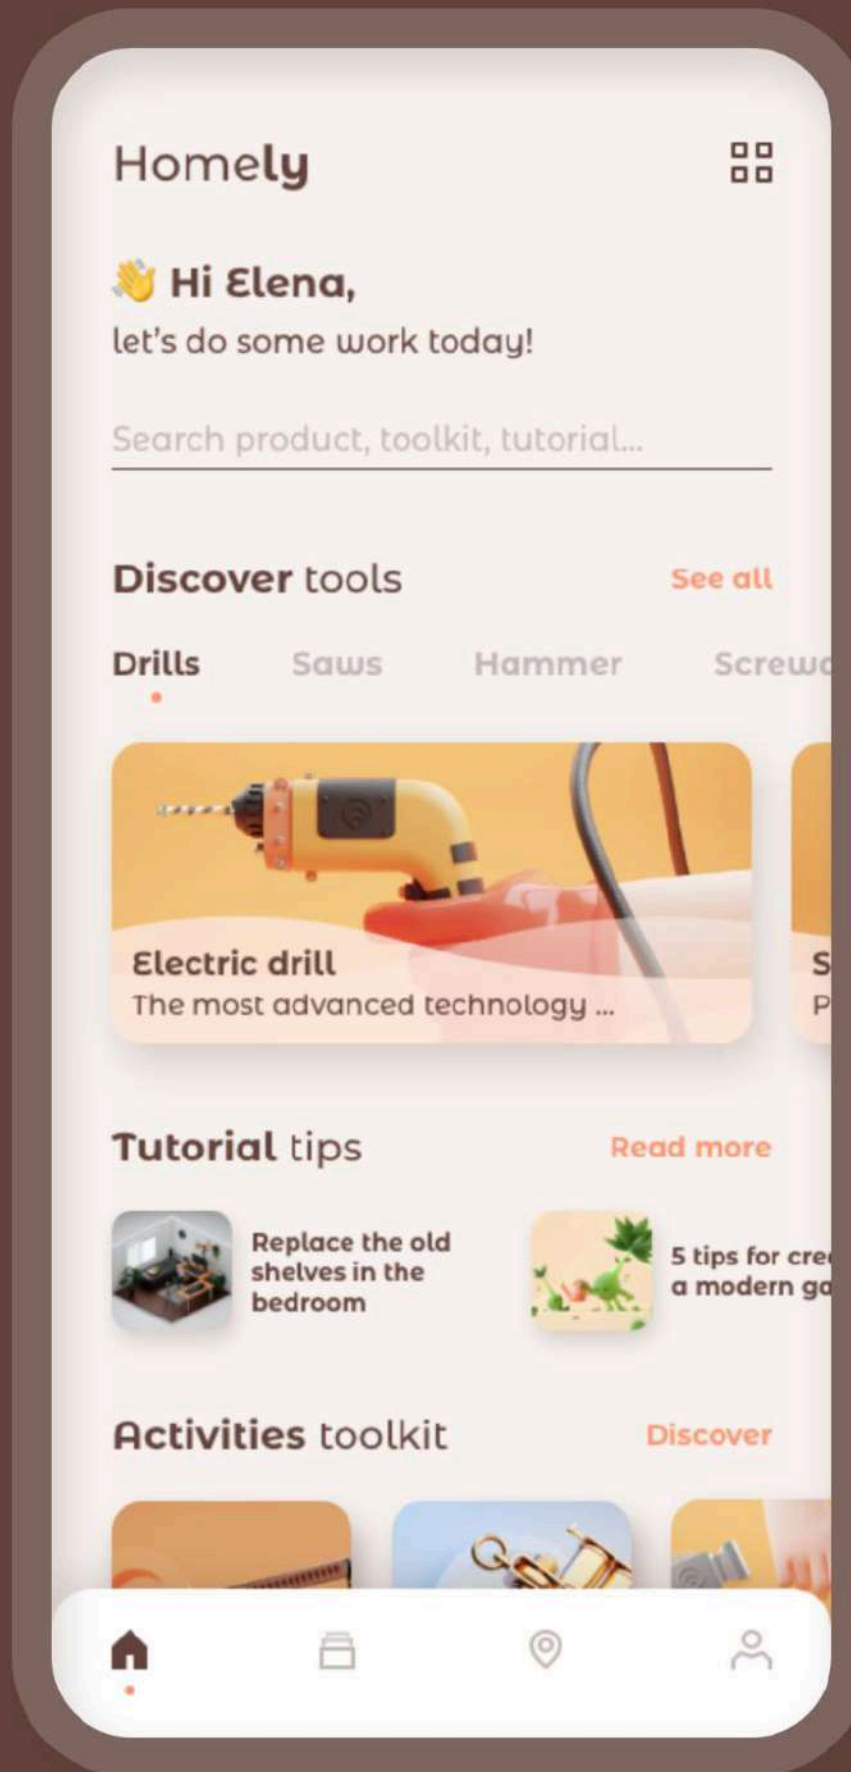

For these users, purchasing tools isn't a practical solution. Renting, on the other hand, is a more convenient, cost-effective, and space-saving option.

The main feature of Homely is the rental of pre-assembled kits, which include all the necessary tools for completing a specific task. These kits are available in lockers located around the city and in large DIY stores.

Splash is a young talent agency that works in the web and digital field with clients all over the world.

The stylistic research, to create the concept of the agency's portfolio site, was focused on the theme of technology and innovation, consequently, both the fonts and the color palette and many other elements present in the wireframes, in many cases reflect these areas.

One of the peculiarities of the project is that it was created entirely in Duo Tone style, combining only two colors together, making the most of opacity and contrasts to enhance every single element present on the website.

The “Porn Gnam” project involves the creation of an e-commerce platform dedicated to the sale of “crap” and “junk food”, with the aim of enhancing the erotic aspect of food. The target to which the concept refers includes all lovers of culinary excess, mostly of a young age.

The project's business model is based on the sale of products online via the e-commerce platform and the app available on stores. A second possibility of earning is represented by the partnership of the most famous brands that can sponsor new releases or limited editions of the most particular foods.

The whole part of the copywriting is based on culinary eroticism and junk food, concepts present in naming, payoff and domain.

INGREDIENTI

- ◆ Spaghetti 320 gr.
- ◆ Tuorli (di uova medie) 6
- ◆ Pepe nero q.b.
- ◆ Guanciale 150 gr.
- ◆ Pecorino romano 50 gr.

PREPARAZIONE

- ◆ Preparate una pentola con l'acqua salata per cuocere la pasta. Nel frattempo eliminate la cotenna dal guanciale e tagliatelo a strisciole.
- ◆ Versate i pezzetti di guanciale in una padella antiaderente e rosolate per circa 10 minuti a fiamma medio alta. Nel frattempo tuffate gli spaghetti nell'acqua bollente e cuoceteli al dente. Intanto versate i tuorli in una ciotola.
- ◆ Aggiungete il pecorino e insaporite con il pepe nero. Amalgamate il tutto con una frusta a mano, sino ad ottenere una crema liscia.
- ◆ Intanto il guanciale sarà giunto a cottura: spegnete il fuoco e utilizzando un mestolo prelevatelo dalla padella, lasciando il fondo di cottura all'interno.

MANIFESTO DEL GRANO

Scopri l'impegno di Barilla per una pasta ancora più buona, fatta con grano 100% italiano.

Il grano dei nostri formati classici da oggi è 100% italiano. Questo grazie a un lavoro di squadra lungo 30 anni tra Barilla e gli agricoltori italiani. Ma non è l'unico traguardo. L'origine non fa di per sé la qualità del grano duro, ne siamo ancora convinti. Per la nostra pasta, da sempre, selezioniamo i migliori grani duri. Già nel 2018 oltre l'80% del grano duro utilizzato dai nostri stabilimenti in Italia proveniva dal mercato nazionale. Oggi possiamo dire con orgoglio che per i formati

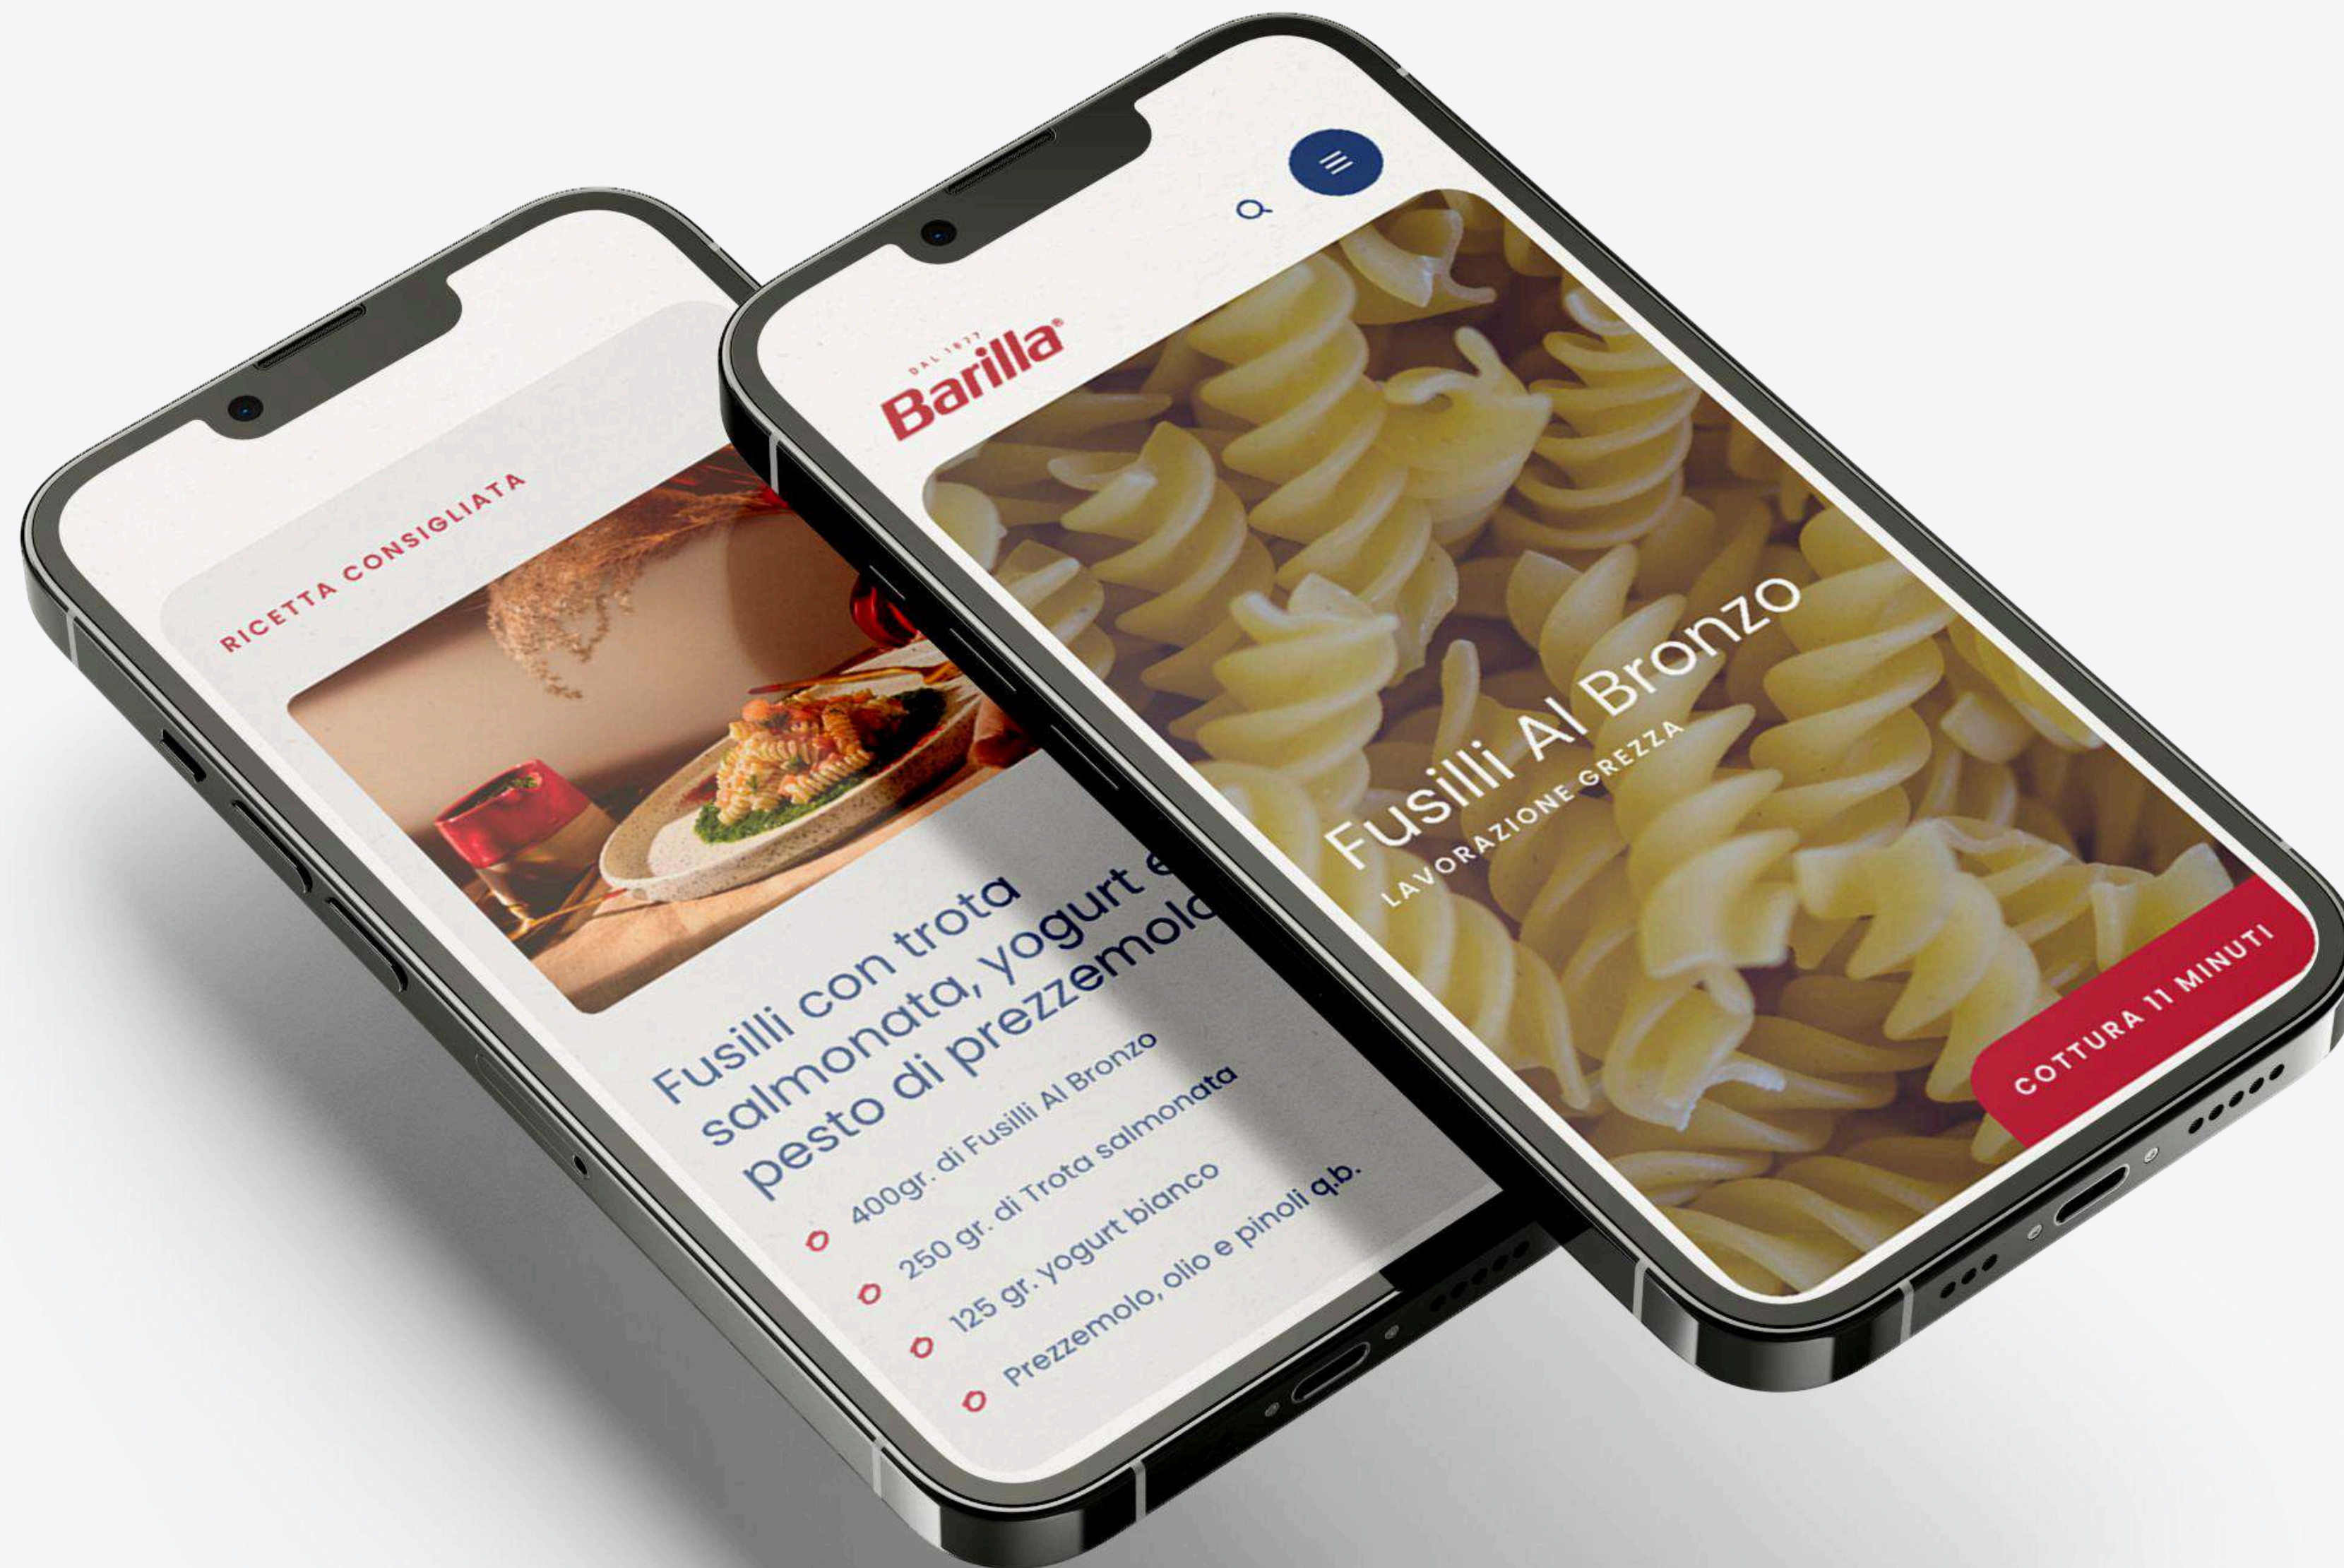

classici siamo riusciti a portare quella percentuale al 100%. Ci siamo arrivati innovando gli agricoltori italiani strumenti e una collaborazione continuativa. Così abbiamo garantito le condizioni attuali per avere un grano duro di qualità prodotto interamente in Italia. Per fare una pasta eccellente però, il grano non basta. Ci vuole anche il saper fare del mugnaio e del pastaio che determinano le scelte migliori per tutte le fasi di creazione della nostra pasta.

Portrait of William I, King of the Netherlands

ARTIST
Joseph Pealinx

DATE
1819

DESCRIPTION

When Napoleon was on the losing side in 1812, Willem Frederik, Prince of Orange-Nassau, returned in 1813 as sovereign monarch of the Netherlands. A month after Napoleon's escape from Elba, he proclaimed himself King of the United Netherlands (present-day Netherlands and Belgium) and Duke of Luxembourg. After the Battle of Waterloo, he was inaugurated as King William I in 1815.

X ecosystem there are other large successful companies, such as Starlink, a constellation of low latency broadband internet access satellites. SpaceX has developed a large fleet of spacecraft including rockets and capsules to transport goods and people. It was able to optimize the construction processes of the various components, thereby significantly lowering costs and research and development times. SpaceX also allowed space exploration in a way that it had never done before, by applying technologies and processes developed by another glorious company: Tesla.

SpaceX began production of launch vehicles with the Falcon 1. A launcher called Falcon 5 was also planned to replace the Falcon 1, but its development was halted in favor of the current Falcon 9 and Falcon Heavy. To date SpaceX is developing a new vehicle: Starship.

Dragon is an orbital transport capsule designed to be reusable and capable of reaching low Earth orbit. In 2006, SpaceX won a contract to use the capsule for commercial refueling services at the International Space Station for NASA.

ABOUT US

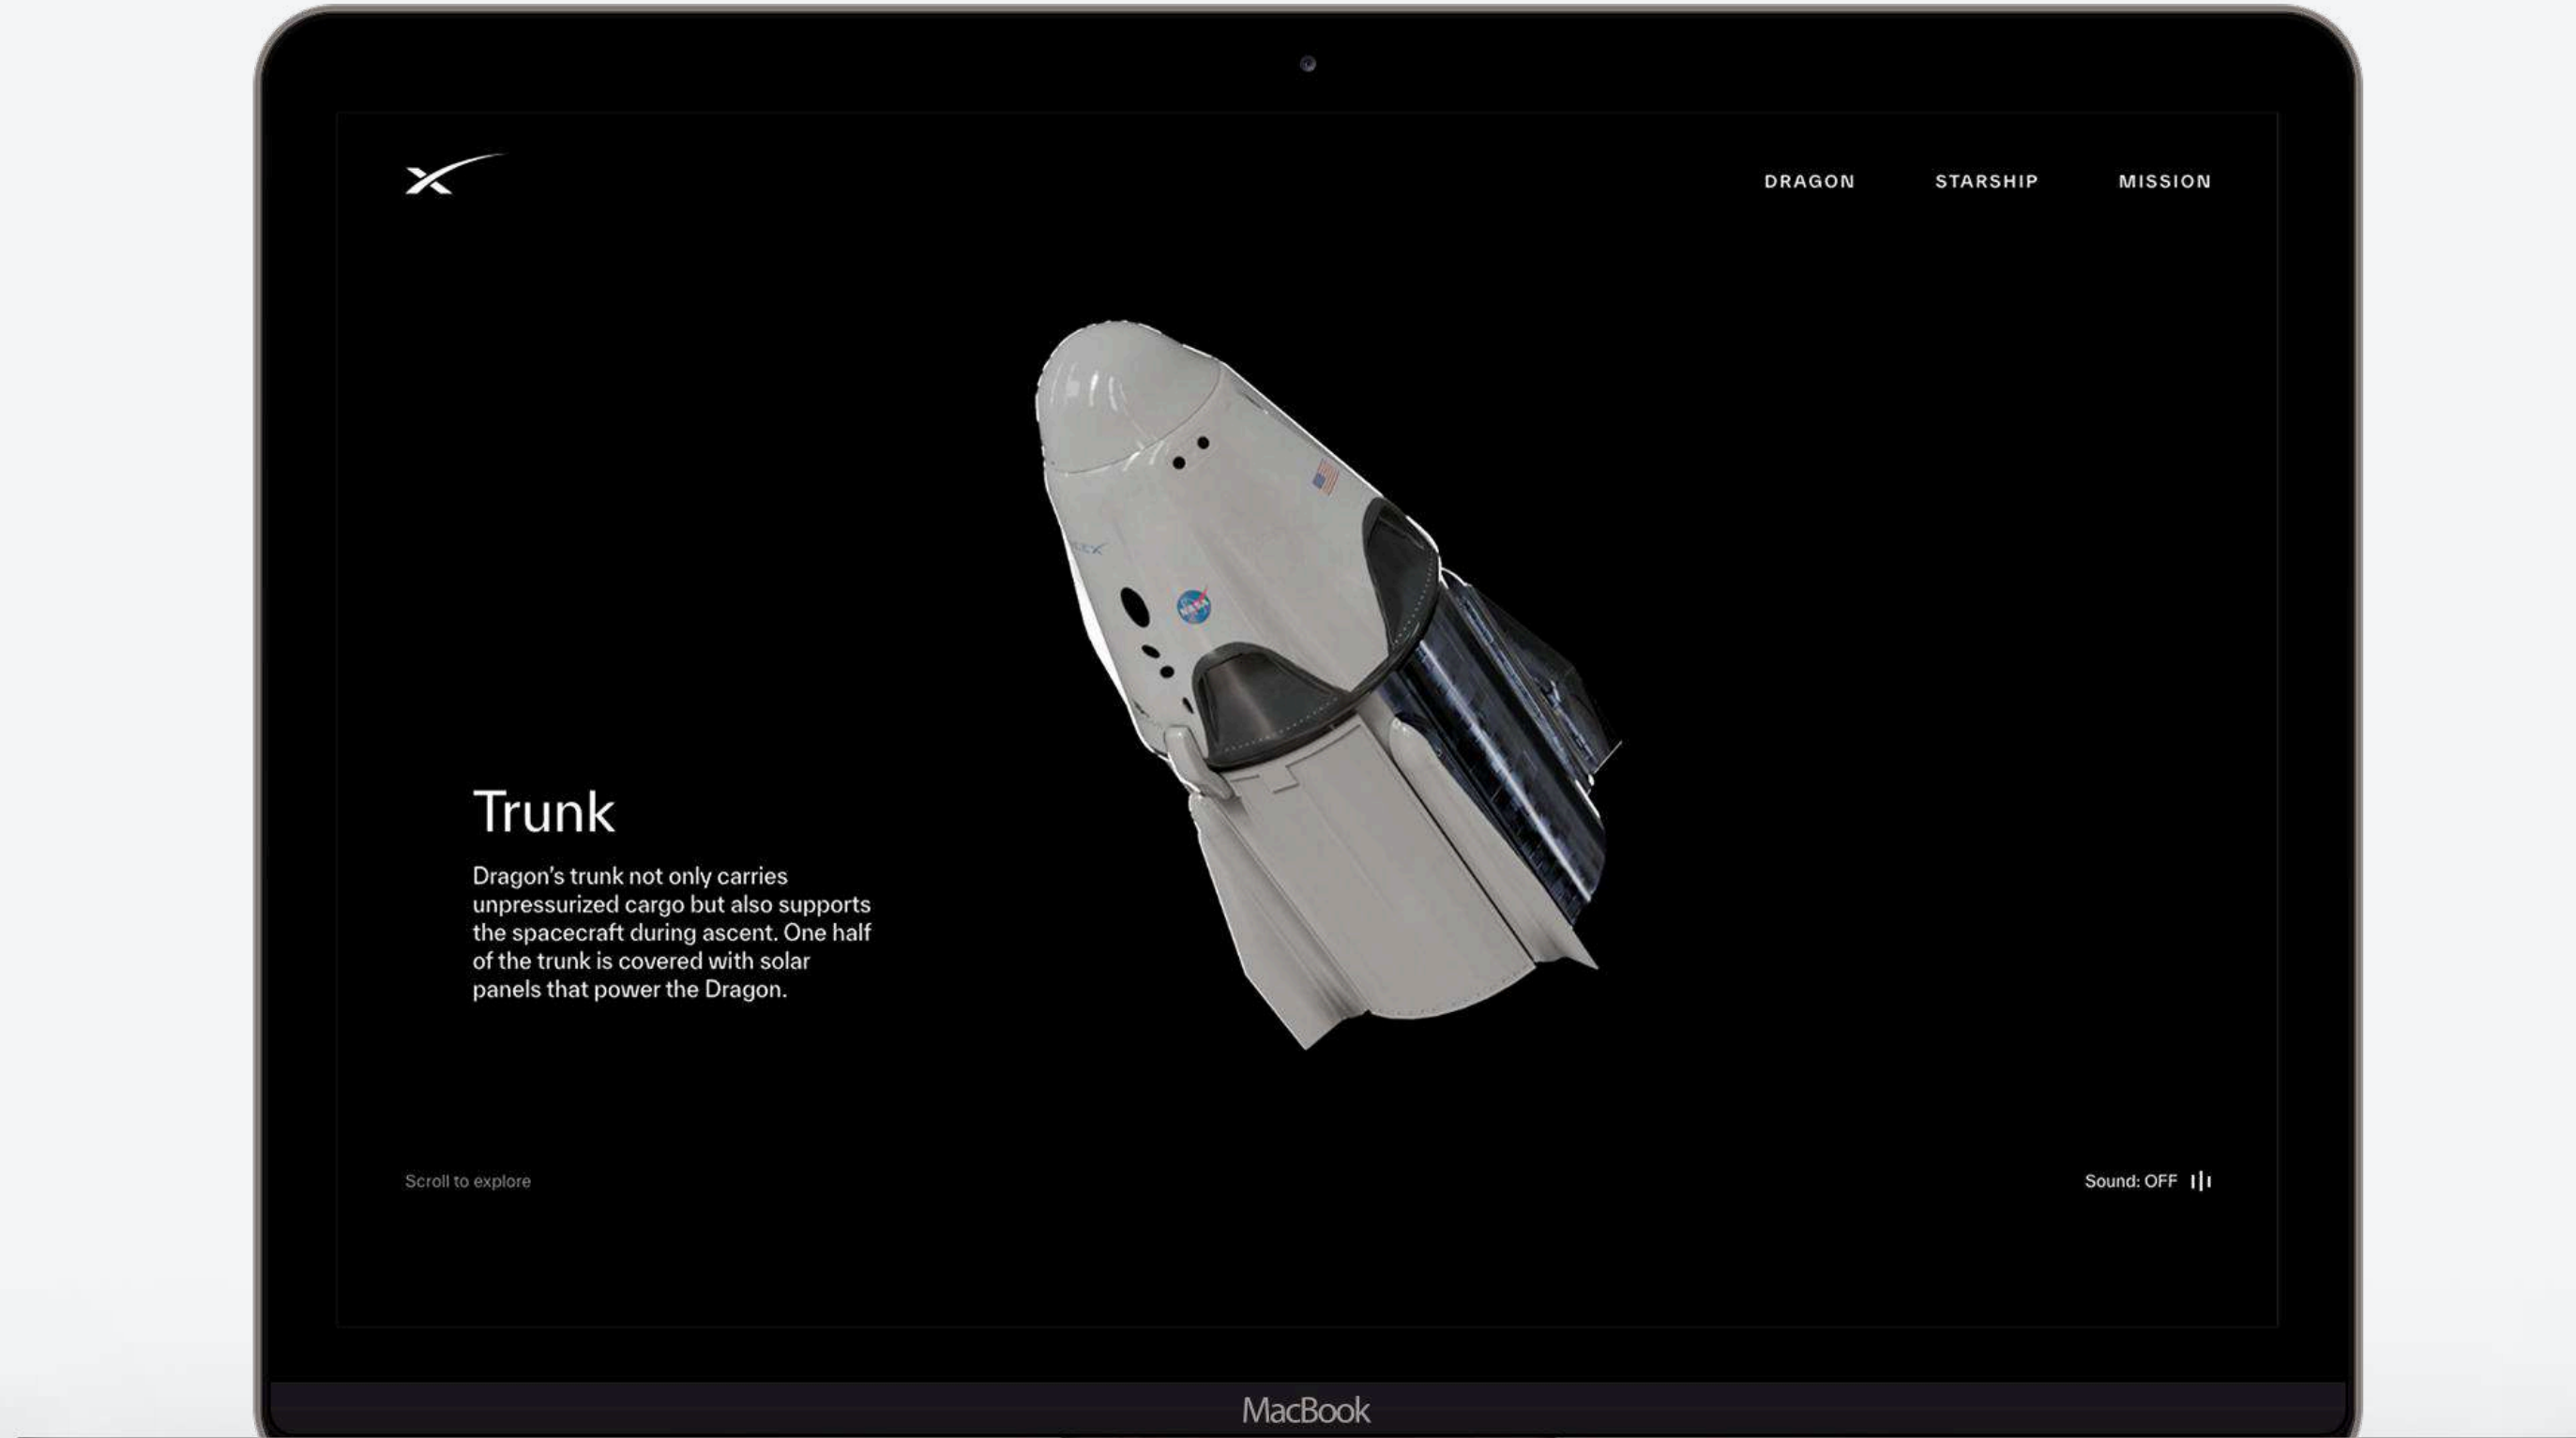

SpaceX is a US aerospace company based in Hawthorne (California), USA, founded in 2002 by Elon Musk with the aim of creating the technologies to reduce the costs of access to space and allow the colonization of Mars.

ECOSYSTEM & FLEET

Revolutionizing access to space.

Within the Space X ecosystem, there are other large successful startups and successful companies. Starlink is a constellation of low latency broadband internet access satellites. SpaceX has developed a large fleet of spacecraft including rockets and capsules to transport goods and people. It was able to optimize the design and construction processes of the various components, drastically lowering costs and research and development times. SpaceX also allowed space exploration in a way that it had never done in previous years by applying technologies and processes developed by another glorious company: Tesla.
